

# Program Information Package (PIP)

MMX NGRS PEA I  
Preproposal  
Teleconference/WebEx

---

**PIP documents are provided by JAXA to aid proposers in developing their concepts for a NASA NGRS instrument to fly on MMX.**

**PIP documents are intended to provide guidance; they are specifically not intended to impose requirements on proposals.**

**Requirements on proposals are set by NASA and are described in the SALMON-3 AO and PEA I.**

**However, proposals that align less well with JAXA practices may be deemed less “accommodatable” than others, and this may have an effect on selection.**
